Constancio Aguirre-Pérez is a lecturer at the Teacher Training School of Cuenca (University of Castilla-La Mancha), Dr. in Chemistry from the University Complutense of Madrid. He is a member of the Pedagogy Department in the area of Didactics in Experimental Sciences (Science Education).

His publications include research into the aptitudes and attitudes of pupils and students towards science from Primary Education through to University level, with a special focus on the difficulties students have in relation to learning concepts in Physics and Chemistry; Education in Museums used as an informal resource within a formal teaching context, especially with regard to science and interactive museums, and the Prevention of tobacco use education in Primary schools.

Constancio has also become involved in promoting the teaching of Science within a Content and Language Integrated learning context (CLIL).

He has published several articles in Spanish and International journals and presented more than 50 papers at Spanish and International Conferences.
