Radovan Kadlic graduated in Telecommunications at the Slovak University of Technology in Bratislava in 2007. He is a external postgraduate student at the same University at the moment. He is currently working for Slovak Telekom company (Fixed and Mobile operator in Slovakia).

His main fields of professional interest are IMS (IP Multimedia Subsystem) IPTV (Internet protocol TV), NGN (Generation Networks) architectures, multimedia services. He is a member of research team participating in the research projects oriented to NGN technologies and multimedia services (national and international research projects). He participates in the development of the NGNlab architecture and building of NGNLab platform at STU Bratislava, focusing on multimedia services, as well as this platform administration.
