Rosa Arruabarrena is a lecturer and a researcher of the Computer Languages and Systems department at University of The Basque Country (UPV/EHU) from 1992. She teaches in the Computer Science Faculty and in the Technical College.

In February 2010 she has also become Secretary of Information and Communications Technology in the Summer Courses and European Courses of the UPV/EHU. The Summer Courses have now reached their 29th Edition, and the European's the 24th.

Rosa Arruabarrena graduated in Computer Science from the UPV/EHU in 1991. Since 2001 she belongs to GHYM Research group (Hypermedia and Multimedia Group), working in the field of software development. The theme of her Ph Dissertation is to calibrate items efficiently. Items are elements that are used to assess students' knowledge or workers' abilities. Her goal has been to propose valid and efficient business process models, based on empirical results, to calibrate items. The Phd has already been submitted.

From 2007 to 2009 she worked in the evaluation of quality and design of international official degrees on the European Union, too.
