## JE PARLE DONC J'ECRIS

|                           |                                                                                                                                                                                                                    |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>DURATION</b>           | September 2003 – September 2005                                                                                                                                                                                    |
| <b>PROJECT OBJECTIVES</b> | The “Je Parle donc J’écris” project aims to experiment a new pedagogical approach through the use of ICT. The teachers involved are trained on the use of the “alfonic” (french phonological alphabet) and of ICT. |
| <b>BENEFICIARIES</b>      | All those interested in learning to read and write in French.                                                                                                                                                      |
| <b>PROJECT LANGUAGE</b>   | French                                                                                                                                                                                                             |

### PROJECT ACTIVITIES

The project “I speak therefore I write” (a Socrates Minerva European programme) wants to help all those who learn reading and writing French, regardless of age and whether they speak French as their native language or learn it as a second or third language.

The project is based on the use of the “alfonic” teaching tool, developed by the French linguist André Martinet, which intends to overcome the difficulties of writing in French, which occur due to the phonetics of the language.

Methodological and innovative teaching approaches are presented and experimented thanks to the use of new ICT.

The project activities are:

- Training teachers to use the «alfonic» tool
- Training teachers to use new ICT and multimedia tools
- Experimentation of the «alfonic» tool with students
- Creation of multimedia games by the teachers involved with the support of technical experts
- Experimentation and evaluation of multimedia games with the students
- Dissemination of the project results
